## IDT 100: Identity Theft Online Course Syllabus

### Module 01

The first weekly session introduces you to the course interface. Module 1 introduces your instructor and explains how the course works. It explains the modules, assignments, interacting with your instructor and other participants, as well as what is required to pass the course and earn your certificate of completion.

You will also be introduced to the subject of Identity Theft or Identity Fraud. You'll gain a solid understanding of what it is, why it is becoming so rampant, and what the common myths are surrounding it.

### Module 02

This is the module on the five W's – Who, What, When, Where, Why.

Who are these identity thieves? What do they want? When and where do they strike? And why do they do it? All these questions and more will be answered in this module. But be warned! You may be in for a huge shock!

### Module 03

Social engineering preys on the weakest link – you! That's right! The human capital used in identity theft cannot be measured with dollar values. And it's getting more complex as time moves on. Learn how the social engineering techniques work and how you can prevent becoming a victim of the easiest vulnerability to exploit – you!

### Module 04

Many people have imagined identity thieves lurking in dark alleys, boiler rooms, and seedy neighborhoods infested with drug dealers and gangs. Let's take a walk. We are going to walk down many streets in many average communities and look at the techniques being used to snatch your identity right out from under you. And in some cases, you just hand it over to them willingly!

This module has been a real eye-opener for many!

**Module 05**

It's a bird! It's a plane! No! It's super ID hero to the rescue!

Ok, so it may work in the comic books, but if you're looking for someone to save you from this problem, look in the mirror. The super hero is you!

In this module you'll discover how only you can save your good name and why the government, credit card companies, and insurance companies can't protect you.

**Module 06**

The course is ending, where do you go from here? In this final module, you'll learn how to write a fairy tale ending to your ID Super Hero story by learning how to keep a step ahead of the villains. You'll be so empowered that even Popeye won't mess with you and you'll never have to eat a can of spinach!

**Appendix:** What to do if you've become a victim of Identity Theft.
